Be In Control of Your Home's Water.

Introducing the Aquasential™ Smart HE Water Softener App.

Staying Connected Has Never Been Easier.

Whether you are home or away, the Culligan Connect app gives you the peace of mind and freedom to control your Aquasential™ Smart HE Water Softener remotely. Push notifications will alert you if any unexpected water flow is detected, and a friendly reminder to contact your Culligan dealer when the salt level is low.

Whether you are tracking your daily working water activity or making sure your softener is running efficiently, it is all done with a simple **tap on the app!** Staying connected makes it possible for you to be in control of your home's water and it has never been easier.

Features.

Key screens displaying information in real time include:

- Dashboard showing all Culligan connected smart products
- Set goals and track your progress
- Water activity and history
- Check, adjust and record salt levels
- Place system in bypass, set the away monitor and start regeneration
- Alerts and message notifications

Staying Connected Has Never Been Easier.

Introducing the Aquasential® Smart RO Drinking Water App.

Control From the Palm of Your Hands.

Whether you are home or away, the Culligan Connect app gives you the peace of mind and freedom to control and monitor your Aquasential® Smart Reverse Osmosis drinking water system remotely. Push notifications will alert you if any unexpected water is detected, and a friendly reminder to contact your Culligan dealer when filters need to be changed.

Whether you are tracking your daily drinking water activity or making sure your system is running effectively, it is all done with a simple **tap on the app!** Staying connected makes it possible for you to be in control of your home's drinking water and it has never been easier.

Features.

Key screens displaying information in real time include:

- Dashboard showing all Culligan connected smart products
- Set goals and track your progress
- Built-in quality monitor shows how your system is performing and the life of your filters
- Leak detection with auto shutoff
- Shows contaminants, minerals and solids that have been reduced
- Alerts and message notifications
